

Nestor

Character Description:

As a creative and energetic Project Partner, you coordinate the Work Package 2 “Coproductions and Artistic Residences Programme.” You are close friend of Agamemnon. Approaching retirement, you love good food enjoyed with friends; you are a wise person but you find it difficult to make hasty decisions and avoids taking risks.

Description of the Organization Represented:

You represent Golden Age Season—a prestigious festival celebrating 30 years of art and culture in Neptune. Despite attracting international celebrities, there’s a big gap between the festival’s glamour and the everyday lives of local residents.

Your Responsibilities in the Oracle Project:

In WP2, you bring together international artists and local talent to create dynamic artistic residencies and co-productions. Your role involves scheduling collaborative events, managing the budget, and ensuring that all projects fit into the overall project timeline. You’re the one who keeps communication flowing between artists and local stakeholders, working hard to bridge that cultural divide.

Individual Goal:

Even though your organization is always busy and sometimes hard to control, your goal is to finish the project with at least 2 resources, making sure that your creative team gets the support it needs.
